

JK-HairCoat™ JK7882-SEV

Quick Use Instructions (Basic Method)

Suitable For

Human hair wigs, hair extensions, hairpieces, toppers, wefts, and raw human hair

Step 1. Prepare the Solution

Mix: Warm water (40°C) 1,000 ml and JK7882-SEV 3 ml

This creates a 0.3% treatment solution.

Reference Capacity: Approximately 1 kg of hair (about 10 hair extensions weighing 100 g each).

Step 2. Apply

Fully immerse the hair in the solution.

Keep the hair in the solution for approximately 10 seconds.

Gently squeeze out excess solution.

<https://wigschool.com/jk-haircoat.htm>

For loose hair or straight hair bundles, comb the hair while it is in the solution to ensure even treatment.

For Curly Hair / Afro-Kinky Hair (Wigs,Toppers), do not comb the hair while it is in the solution. Instead, Press ↓ Release ↑ Press ↓ Release ↑ several times to allow the solution to penetrate evenly.

IMPORTANT

The ionic bonding process is completed within approximately 5–10 seconds. Therefore, soaking for 10 seconds, 1 minute, 10 minutes, or even several hours generally do not produce significantly greater effects in treatment performance.

Step 3. Dry

Allow the hair to dry completely.

Keep the hair straight and untangled during drying.

<https://wigschool.com/jk-haircoat.htm>

Recommended methods:

Natural air drying

Warm-air drying

Drying oven (approximately 80°C)

Natural Drying Notes

Avoid direct sunlight while drying.

For curly hair, do not hang the hair from a clothesline.

Instead, lay the hair flat on a clean surface or drying rack to help maintain the curl pattern.

Step 4. Cool Down (Important)

If an oven or drying machine is used, allow the hair to cool completely before touching, combing, brushing, or packing.

Do not handle the hair while it is still warm.

Notes

The treatment works within seconds.

Use clean water whenever possible. Best results are obtained when the hair is clean before treatment.

Dry the hair completely before use, styling, or packaging.

Typical Results

Improved smoothness

Reduced tangling

Softer touch

Better manageability

Enhanced shine

Longer-lasting appearance improvement
